Objective

passionate flutter developer with experience in building cross-platform applications. skilled in firebase integration, Kotlin configuration, and api integration. currently developing an appointment booking app featuring multiple doctors and specializations. strong problem-solving abilities and a keen interest in improving user experiences through efficient mobile solutions.

Education

Zagazig university, Faculty of computer and informatics

bachelor's in information technology | 2021- 2025

Work experience / internship

Trainee | Digital Egypt Pioneers Initiative (DEPI)

Mobile Development Track | October 2024 – Present

- Applied UI/UX principles to enhance user experience and optimize interface design.
 - Built a strong foundation in Java and Object-Oriented Programming (OOP).
 - Developed proficiency in Kotlin and Android development for native mobile applications.
 - Gained experience with Git and GitHub for version control and collaborative coding workflows.
-

Projects

appointment booking app

developing a flutter-based appointment booking application that enables users to schedule appointments with doctors from various specializations.

GitHub: [appointment booking app](#)

- user authentication: secure login and registration using firebase authentication.
- doctor listings & specializations: users can browse doctors based on their specialties.
- appointment scheduling: users can book, reschedule, or cancel appointments.
- real-time notifications: users receive reminders for upcoming appointments.

Saturn App – Social Platform for Arts & Videos

A Flutter-based social platform for artists and content creators to showcase and sell their work.

GitHub: [Saturn App](#)

- User Posts & Engagement: Users can share artworks, videos, and designs, and engage with content through likes, comments.
- Messaging & Commerce: Integrated a chat system for users to connect and purchase products from artists.
- Real-time Updates: Firebase backend enables seamless synchronization messages.
- Optimized UI/UX: Designed an intuitive and visually appealing interface for an enhanced user experience.

Habit tracking app

a mobile application designed to help users build and maintain good habits.

GitHub: [habit tracking app](#)

- custom habit creation: users can add, edit, and remove habits.
- daily & weekly tracking: progress visualization with graphs and streak tracking.
- reminders & notifications: timely reminders to complete daily habits.

Weather application

a real-time weather app built with flutter that provides accurate weather updates and forecasts.

GitHub: [weather application](#)

- current weather data: displays temperature, humidity, wind speed, and conditions.

- **7-day forecast:** hourly and daily weather predictions.
- **multiple city support:** users can search and save different locations.

Muslim app (Islamic application)

developed an islamic app that provides daily azkar, quran tracking, and hadith collections.

GitHub: [muslems app](#)

- **daily azkar & supplications:** categorized into morning, evening, and general azkar.
- **quran tracker:** saves the last surah and ayah you read for easy continuation.
- **hadith collection:** includes a variety of authentic hadith for users to read.

Chat application

developed a real-time chat application with flutter, allowing users to send messages, images, and multimedia.

GitHub: [chat application](#)

- **user authentication:** secure login and sign-up using firebase authentication.
- **real-time messaging:** messages are sent and received instantly using firebase firestore.
- **end-to-end encryption:** ensures private and secure communication.

Technical skills

programming languages & frameworks

flutter & dart

kotlin (android development)

c++ & oop

sql & firebase firestore

rest api integration

development tools

vs code & android studio

postman (api testing)

git & github

figma (ui/ux prototyping)

state management

bloc / cubit

provider

Soft skills

problem-solving & debugging

team collaboration

communication & leadership

time management & deadline-oriented

adaptability & quick learning

Certifications & Courses

flutter development course – tharwat samy (udemy)

c++ & oop fundamentals

sql database management

data structures & algorithms

android development with kotlin

Open source & contributions

contributed to open-source flutter projects on github.

developed custom flutter packages for state management and ui components.

participated in google developer groups (gdg) meetups to stay updated on flutter advancements.

Languages

English – proficient

Arabic – native
